STUDENT LEARNING ACHIEVEMENT

Bangkit ID : A460B4KY2878
 Name : Mohammad Hanif Abrar
 University : Universitas Pembangunan Panca Budi

Bangkit Completion : Full Graduate
 Learning Path : Mobile Development
 Capstone Status : Finished

No	Courses/Specialization/Activities	Learning Outcome	Hours	Score (0-100)	Score Description
1	Basic Kotlin	By the end of the course, the student will be able to comprehend the basic concepts of programming languages, functional programming, and object-oriented programming (OOP) using Kotlin.	50	73.8	The student well comprehends the basic concepts of programming languages, functional programming, and object-oriented programming (OOP) using Kotlin.
2	Beginner Android	By the end of the course, the student will be able to build an Android application that displays lists and detailed data.	60	73.8	The student is skilled in building Android applications that display lists and detailed data.
3	Android Fundamental	By the end of the course, the student will be able to build applications that allow data to be fetched from Web API and stored locally.	140	73.8	The student is proficient in building applications that allow data to be fetched from Web API and stored locally.
4	Intermediate Android	By the end of the course, the student will be able to build an application by implementing various existing components, such as UI, Animation, Localization, Background Process, Media, Sensor, Location, Database, Testing, Firebase, and Jetpack Compose.	150	75.7	The student is adept at building an application by implementing various existing components, such as UI, Animation, Localization, Background Process, Media, Sensor, Location, Database, Testing, Firebase, and Jetpack Compose.
5	Introduction to AI	By the end of the course, the student will be able to identify, understand, and analyze various fundamental concepts in AI.	10	64	The student is sufficiently able to identify, understand, and analyze various fundamental concepts in AI.
6	Applied Machine Learning for Android Developer	By the end of the course, the student will be able to develop Android applications that implement local machine learning to classify images using the camera.	60	73.8	Students are qualified to efficiently develop Android applications that implement local Machine Learning to classify images using the camera.
7	Capstone / Final Project	By the end of the course, the student will be able to begin stages of a final project, namely developing an application/solution that validates their product development skills and boosts the portfolio.	212	76.6	The student can begin stages of a final project, namely developing an application/solution that validates their product development skills and boosts the portfolio.
8	Soft skill & Career Development	By the end of the course, the student will be able to comprehend Life Path, Growth Mindset, The Power of Feedback, Time Management, Critical Thinking, Problem Solving, Adaptability, Resilience, Project Management, Professional Branding and Interview Communication.	230	73.9	The student thoroughly comprehends Life Path, Growth Mindset, The Power of Feedback, Time Management, Critical Thinking, Problem Solving, Adaptability, Resilience, Project Management, Professional Branding and Interview Communication.
